SUMMARY

A highly accomplished Mobile Developer with 5 years of experience specializing in cross-platform Android and iOS application development. Proficient in leveraging the Ionic framework, Angular, TypeScript, and Capacitor to build robust and high-performing mobile solutions. Possesses strong complementary skills in UI/UX design, consistently utilizing this expertise to define and create user-centric application interfaces that guide the development process. Seeking to apply advanced technical and design acumen in a challenging development role.

WORK EXPERIENCE

Senior Mobile Developer - PT. Bidik Inovasi Global | Sidoarjo, Indonesia **Jan 2023 - Aug 2025**

- Developed and maintained various cross-platform mobile applications for Android and iOS using Ionic, Angular, and Capacitor.
- Spearheaded the creation of a Canvassing Taking Order application to streamline the sales and inventory process.
- Engineered a Store Survey application enabling users to rate and share product display information, enhancing market intelligence.
- Managed the end-to-end application distribution lifecycle, including handling submissions, updates, and maintenance on both Apple App Store Connect and Google Play Console.

Mobile Developer - PT. Geo Given Visi Mandiri | Sidoarjo, Indonesia **Oct 2020 - Jan 2023**

- Responsible for the full development lifecycle of business applications used by the sales team.
- Developed a comprehensive Sales Tracking application used for real-time recording of stock levels, promotions, and product visibility in retail stores.
- Created a customized Customer Relationship Management (CRM) application to support effective customer interaction and data management.

EDUCATION

Associate Degree - Informatics Engineering **Oct 2020**

- Electronic Engineering Polytechnic Institute of Surabaya (EEPIS)

KEY PROJECTS & PORTFOLIO

- **Digital Sales Reporting App:** Engineered a robust mobile application for sales teams to accurately and instantly report key metrics, inventory, promotions, and sales activities, significantly improving data reliability.
- **CRM Fukumi Life Application:** Contributed to the development of a tailored Customer Relationship Management (CRM) application, enhancing lead tracking and customer data management.
- **Digital Library Platform (Mamuju Tengah):** Developed a custom digital library application deployed to several schools, expanding access to educational resources.
- **UI/UX Design for Perhapi:** Led the User Interface (UI) and User Experience (UX) design process, establishing the design guidelines and wireframes that served as the blueprint for application development.
- **SnapStar (Coca-Cola Display Survey) App:** Developed a high-impact mobile application for outlet surveys, allowing users to rate and document product display quality, providing real-time data for market visibility
- **etc.**
